

Episode Surroundscape Series Burial Subwoofers (8"-12")

ES-SS-SUB8, ES-SS-SUB10, ES-SS-SUB12

This subwoofer is available in 8", 10", or 12" drivers and provides the perfect bass level to complement Episode Surroundscape satellite speakers. Its sophisticated earth-tone dome effortlessly blends with any outdoor aesthetic, adding rich depth for audio enhancement.

Built to Survive

Rotomolding is a popular manufacturing process used in portable recreation coolers. Its IP67 ingress protection rating eliminates dust and water intrusion while allowing for reliability in the most demanding moisture conditions, including submersion.

Discreet Appearance

Every part of this subwoofer gets buried underground, with only the ported "mushroom" coming up for air. This means you can add a powerful subwoofer to any landscaping without it being visible or taking up precious patio space.

Better Together with an Episode Hybrid Amplifier

Episode Landscape speakers are compatible with most DSP amplifiers, but we recommend pairing the system with an Episode Hybrid amplifier to guarantee the best performance.
